# About us

## Company profile

MEDICHEM Diagnostica has more than 30 years experience in development and production of In-vitro-diagnostics.

MEDICHEM Diagnostica has been founded by Atou Khalide Lô in 1986. In 1998 his son Insa Lô joined the company as a partner, he finally became managing director in 2004.

In 1989, MEDICHEM began working closely with forensic institutes and medical laboratories to develop reference materials for quality control of toxicological and forensic analyses.

Soon after, MEDICHEM was commissioned with the manufacture of control samples for proficiency tests. These samples were used both nationally and internationally as external quality controls by reference institutions, beginning with the DGKL (German Society for Clinical Laboratory Medicine, formerly DGKC), the GTFCh (Society of Toxicological and Forensic Chemistry in Germany), the CSCQ (Centre Suisse de Contrôle de Qualité) and the SFTA (Société Française de Toxicologie Analytique), among others.
